- For in-vitro diagnostic use. Not to be taken internally.
- Single-use device. Do not reuse.

If you have any questions please call us toll-free at 1-800-367-6022, Monday-Friday from 7:00 AM to 5:00 PM Eastern Time. Visit us online at www.FirstResponse.com

When to use the FIRST RESPONSE™ Early Result Pregnancy Test

The FIRST RESPONSE™ Early Result Pregnancy Test is designed to detect hCG (human chorionic gonadotropin) (hCG) as early as 6 days before your missed period or 5 days before the expected period. You can use the test at any time of day. You do not have to use first morning urine. For pregnancy, urine stream contains the highest level of pregnancy hormone.

**QUESTIONS & ANSWERS**

Q: How does the test work?
A: The FIRST RESPONSE™ Early Result Pregnancy Test detects in urine the hormone your body produces during pregnancy, human chorionic gonadotropin (hCG).

Q: When can I test with FIRST RESPONSE™ Early Result Pregnancy Test?
A: The FIRST RESPONSE™ Early Result Pregnancy Test is designed to detect hCG as early as 6 days before your missed period (5 days before day of the expected period). The amount of pregnancy hormone increases as pregnancy progresses. In laboratory testing with early pregnancy urine samples, FIRST RESPONSE™ gave the following results.

Q: How accurate is the test?
A: A positive pregnancy test result shows that the pregnancy hormone (hCG) was detected, which normally indicates pregnancy. You must see your doctor to confirm that you are pregnant. If you test positive, but think you may not be pregnant, you should check with your doctor.

Q: What do I do if the result is positive (pregnant)?
A: A positive pregnancy test result shows that the pregnancy hormone (hCG) was detected, which normally indicates pregnancy. You must see your doctor to confirm that you are pregnant. If you test positive, but think you may not be pregnant, you should check with your doctor.

Q: What do I do if the result is negative (not pregnant)?
A: You may not be pregnant, or it may be too early to tell. If you do not get your period within 7 days, you should retest with another FIRST RESPONSE™ Early Result Pregnancy Test. It is possible that you may not have had enough pregnancy hormone for the test to give a positive result. If upon retesting you get another negative result and your period has still not started, you should call your doctor.

Q: I have waited longer than 3 minutes and still there are no lines in the Result Window. Is there anything wrong?
A: Your result should appear within 3 minutes. There should be at least one pink line in the Result Window. If not, the test is invalid. This could be due to insufficient urine on the Absorbent Tip or not holding the device with the Absorbent Tip pointing downward while replacing the Overcap. You should retest with another device, carefully following all directions.

Q: Will the result change if left standing for a certain period of time?
A: The test result should be read as soon as possible after waiting the 3 minutes. A negative result should not be read after 10 minutes.

Q: Do any drugs or medications affect the test?
A: Only medications containing the pregnancy hormone, human chorionic gonadotropin (hCG), can affect the result (for example, A.P.L., Premarin, and Progynon). The test should not be affected by hormone therapies containing Clomiphene citrate (for example, Clomid and Serophene), alcohol, painkillers, antibiotics, or the contraceptive pill.

**INSTRUCTIONS**

- After reading the insert and when you are ready to perform the test, remove the test stick from the pink foil wrapper and take off the Overcap.

**STEP 1**

**EITHER**

- Holding the test stick by the Thumb Grip with the Absorbent Tip pointing downward and the Result Window facing away from your body, place the Absorbent Tip in your urine stream for 5 seconds only.

**STEP 2**

- While still holding the stick with the Absorbent Tip facing downward, replace the Overcap and lay the stick on a flat non-absorbent surface with the Result Window facing up.
- You may soon see a pink color moving across the Result Window to indicate the test is working.
- Wait 3 minutes until reading result.

**STEP 3**

- **PREGNANT**
  - Two pink lines in the Result Window.
  - One line may be lighter than the other.
- **NOT PREGNANT**
  - One pink line in the Result Window.

**READING THE RESULT—READ YOUR RESULT AT 3 MINUTES**

To increase your chances for a healthy pregnancy for you and your baby, you should consider the following:

- Maintain a well-balanced diet
- Stop smoking
- From conception through the first three months of pregnancy is the most important time. You need to see your healthcare professional immediately for proper care and nutrition counseling.

**WARNING:** According to the Surgeon General, women should not drink alcoholic beverages during pregnancy because of the risk of birth defects. Trying to get pregnant...

Many women do not know that their most fertile days are the days leading up to ovulation when you ovary releases an egg to be fertilized by the sperm. To become pregnant sooner, you should become more familiar with your ovulation cycle.

The FIRST RESPONSE™ Ovulation Test kit is an at-home, one-step test designed to predict ovulation by monitoring changes in your hormone levels.

With the help of the FIRST RESPONSE™ Ovulation Test kit, you can predict your peak fertility days and get pregnant sooner.
